
Study with us

On this website, you will find all the information to help you make one of the biggest decisions in your life – **choose the right university.**

Charles University has a long tradition of being the knowledge hub of Central Europe. We are the **oldest** and the **biggest** university in Czechia, spanning **3 different cities**. Our students are not separated from everyday life since we don't have a single centralised campus. Instead, they can freely partake in the public or cultural life and become active members of society. From **50.000 students**, more than **20% are international**.

In English, we offer **30 direct entry programmes** which you can pursue immediately after your high school graduation (Bachelor's programs or Long-cycle Master's programs). If you already hold a bachelor's degree, you can apply for one of our **65 Follow-up Master's programmes** (post-Bachelor's). To prospective doctoral candidates, we may offer **250 Doctoral programmes**.

Just in our degree programmes in English, we have more than **5.000 students from 130 countries**. The remaining half of our international students chose to study in the Czech language, which is **free of charge**.
