
Circular Economy - Challenges and Opportunities in an Evolving European Landscape.

Circular Economy – Challenges and Opportunities in an Evolving European Landscape.

The webinar is organised within the framework of **1CORE**, focused on disseminating the values of a green, digital and resilient 4EU+ Alliance. About the Webinar

As Europe accelerates its transition towards more sustainable and resilient economic models, the concept of circular economy is becoming a key driver of transformation across industrial sectors. This webinar will explore how this transition is reshaping policies, industries and partnerships in the evolving European landscape.

The discussion will refer to major European initiatives, including:

- the **Circular Economy Act**
- the **Clean Industry Act**
- the **European Green Deal**

Through **three case studies from different sectors**, the webinar will present concrete examples of innovative approaches contributing to a sustainable future in a rapidly changing world.

The session will encourage dialogue between academia and societal actors, featuring experts from the 4EU+ Alliance's associated partners – the Municipalities of Milan and Warsaw and the Cariplo Foundation.

Why Attend?

- Gain insight into the latest European policy developments on circular economy
- Explore practical case studies demonstrating real-world impact
- Engage with experts from academia, municipalities and foundations
- Be part of the discussion on building a greener, more resilient Europe
