## Large research infrastructures

Involvement of Charles University in research infrastructures can be found in this [table](#) . You can find there links to specific infrastructures and contact details.

“Research infrastructure is a research facility necessary for comprehensive research and development with high financial and technological intensity, which is approved by the government and established for use by other research organisations.”

*Do you want to know what research infrastructures are? Find out more [here](#) .*

Research infrastructures are one of the key pillars of national research and innovation systems of the EU Member States, the European Research Area as a whole, and other formations of the macro-regional and global dimension and impact. They form the backbone network for excellent basic and applied research and they are a platform for the development of the most advanced technologies that are characterised by large knowledge-intensity and a potential to be applied in innovative goods and services with high added value.
