# Support for Postdoctoral Researchers

---

We are intensively strengthening support for postdoctoral researchers, **a key component** of our academic community. We are expanding the educational offering in line with the European ResearchComp framework, which includes courses in Czech, research management, and open science available through the [Postdoctoral Hub](#) and **4EU+ Alliance courses**.

We are introducing a robust mentoring system that facilitates integration and collaboration. We are increasing the visibility of postdoctoral researchers by sharing experiences through podcasts and a shared space for collaboration at Campus Hybernská. In cooperation with Czexpats, we organize the Young PI Forum twice a semester for dialogue among researchers. These steps strengthen our academic community and support the sharing of knowledge and experience across various academic disciplines.
