
Lucie Fríbortová

**Student at the Faculty of Arts, CU, majoring in Bohemistics and Languages and Communication of the Deaf
(23 years old)**

Lucie was born on the magical date of 12 December 2000. Since the first grade, she attended art and piano classes at the Elementary Art School in Strakonice. Her art education, which she completed with a final exam, accompanied her throughout her secondary school studies. She graduated with excellent grades from the eight-year secondary school in Strakonice and, after graduation, began her studies in Czech Studies at the Faculty of Arts, Charles University, adding the field of Languages and Communication of the Deaf to her course load.

Her love for the Czech language and her talent for playing with words and rhymes were central to her poetry, which she had been passionate about since high school. Among her favourite authors was J. H. Krchovský. Her poems were published in three collections on Wattpad under the pseudonym singinwolf. To honour Lucie's memory, we would like to publish her poems in a book.

Throughout her life, Lucie admired the beauty of nature, from which she drew both energy and inspiration. In her spare time, she carefully and lovingly cared for her pets and flowers, continually expanding her collection. She enjoyed listening to her favourite bands. Her priorities included an interest in sustainable fashion, which she loved to wear, and a deep concern for the environment, coupled with a desire to make the world a better place.

She always wanted to help others and enhance their lives, including through education. She was the most tolerant, inspiring, kind, dedicated, loving, sensitive, and endearing soul her fellow human beings could ask for. She shared her noble hobbies and interests with her loving family and friends.
