
Research and Educational Cooperation with Ukraine

Charles University has long supported cooperation with Ukrainian institutions and researchers, including those working at Charles University as well as those working directly in Ukraine.

Among the tools Charles University uses is [Rector's Directive 15/2025](#), which enables joint applications for small grants of up to CZK 100,000 by Czech and Ukrainian researchers. Each PI can apply repeatedly, up to three times. The funds are intended to support the development of research and educational cooperation in various fields.
