FOREWORD BY THE RECTOR

Dear colleagues, dear students, friends of Charles University,

although I only took office on 1 February 2026, please allow me to briefly look back on the past year with you and recall some key events and achievements at Charles University.

The year 2025 was one in which Charles University saw a period of qualitative shift in science and education, and the maintenance of its prestige. The University retained its strong position in international rankings; it was ranked 246th in the world in the QS World University Rankings and maintained its status as one of the few institutions from Central and Eastern Europe to remain in the top 2% of universities in the world. It thus confirmed its significant competitiveness in a number of fields, especially in medicine, the natural sciences and the humanities.

Charles University achieved concrete and measurable results in science and research. In 2025, researchers from Charles University received prestigious grants from the European Research Council (ERC Starting Grant). 25 projects have already received funding from the ERC, and as many as 93 in the Horizon Europe programme, with 22 receiving funding in 2025.

It is also worth mentioning that our university has become the leader of the OpenEuroLLM project, which focuses on the development of next-generation open large language models. Thanks to funding from European sources, the Charleston project to support doctoral students was launched. We also hosted a number of prestigious international events throughout the year.

The University was also prominent in the creative and social contribution made by both academic and scientific staff, as well as students, at both national and international level. The Neuron award, one of the most prestigious scientific awards in the Czech Republic, was won by eight figures associated with our university. Four people associated with the University received the Award of the Minister of Health for their contribution to research and

development in healthcare. Charles University became the first university in the Czech Republic to win the HR Excellence in Research Award two years in a row, confirming its long-term efforts to create a supportive, transparent and modern working environment. Moreover, for the first time in history, the European Research Council (ERC) invited a representative of our university to join its ranks.

A number of workplaces achieved excellent publication results in impacted journals, and many outputs by scholars at CU ranked among the highly cited works in their fields.

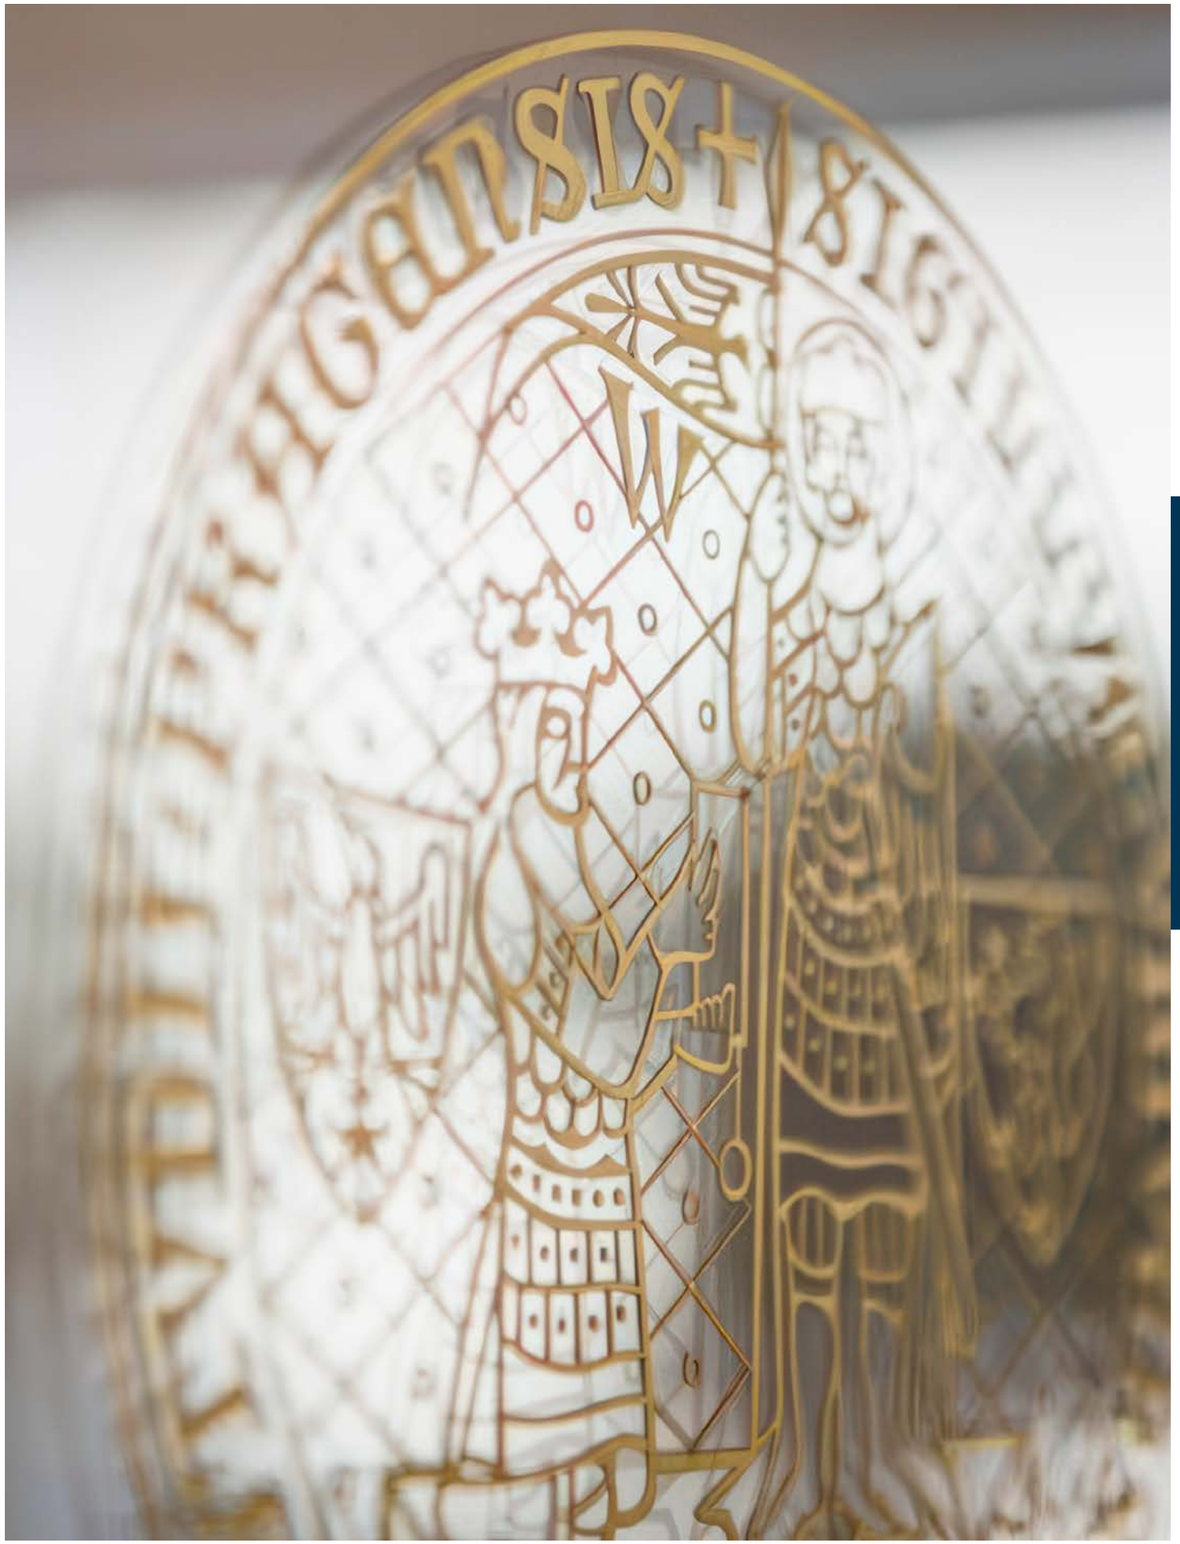

In the field of education, Charles University offered more than 900 accredited study programmes across all levels of study and educated more than 55,000 students. Approximately one in five students came from abroad. Students and employees undertook 4,500 trips abroad. At the same time, the growing internationalisation of Charles University was confirmed by the thousands of international students that study here.

I should also mention our students' excellent performance in sporting events. Almost fifty athletes were nominated for the Czech national team for the 32nd Summer World University Games in Germany and for the FISU Winter World University Games in Turin, where they achieved fantastic results. Representatives of our university were also prominent in other international sports competitions and academic championships.

The year 2025 once again showed that Charles University is not only an institution with a rich tradition, but a lively and self-confident place that knows how to respond to modern trends. It is able to value its history while looking ahead with boldness and ambition, allowing it to compete at international level.

Dear colleagues, dear students, let me end by thanking those of you who helped us achieve these results. I am convinced that Charles University is built on solid foundations and is able to rely on exceptional personalities who are ready to contribute to its further development. I believe that by working together, we will continue to strengthen its position as a modern, open and respected institution of European significance, and that together we will be able to face the challenges that lie ahead.

prof. RNDr. Jiří Zima, CSc.
Rector of Charles University

CALENDAR OF EVENTS IN 2025

Honorary doctorate for Cardinal Kurt Koch

08/01 Cardinal Kurt Koch received an honorary *doctor honoris causa* degree in theological sciences at the Carolinum. He was awarded the title on the initiative of all three theological faculties of Charles University, i.e. Catholic, Evangelical and Hussite, for his support and development of dialogue between Christian denominations and between Christianity and Judaism.

Artificial intelligence at the service of people

An interdisciplinary project exploring the societal impacts of artificial intelligence and its potential for strengthening democratic principles was launched under the leadership of the CU Faculty of Social Sciences. The project won a prestigious grant from the Technology Agency of the Czech Republic and will receive total funding of 125 million CZK until the end of 2029.

Neuron pro sedm osobností z UK

19/01 V kategorii *Cena Neuron pro nadějné vědce 2024* si ocenění předávané v prostorách Národního muzea odnesli: Klára Hlouchová (biologie), Jan Volec (matematika), Jan Křetínský (počítačové vědy), Ota Pavlíček (společenské vědy), Tomáš Pluskal (chemie), Petr Šulc (fyzika), Martina Benešová Schäfer (medicína). Historicky prvním laureátem *Ceny za rozvíjení lásky k vědě* pro učitele se stal profesor Jan Černý (PřF UK) za popularizaci vědy a podporu mladých talentů.

Charleston to support researchers

Over a period of five years Charles University, through its Charleston project, will fund twenty postdoctoral internships for fledgling researchers with long-term international experience in research. Charles University was the only successful applicant from the Czech Republic and will receive 60 million CZK for the project under a flagship EU programme.

January 2025

Gaudeamus no. 17

21.–23/01 Charles University was represented at the 17th edition of Gaudeamus Prague 2025, the European trade fair for postsecondary and lifelong learning, where it had a rich programme of events. The fair, hosted by PVA Expo Prague, was attended by 360 educational institutions. Among other things, CU provided information on 600 study programmes to visitors.

Visit by the President of Portugal

06/02 The President of Portugal, Marcelo Rebelo de Sousa, a university professor of many years' standing, held talks with the management of Charles University at the Carolinum on deepening cooperation between Charles University and the University of Coimbra in Portugal. Our esteemed guest also met Portuguese students, whom he met in the Hall of Patriots following a lecture entitled Europe in a Changing World.

February 2025

CU among institutions with the best reputation in the world

20/02 The results of the Times Higher Education World Reputation Rankings 2025 among academics and university staff ranked CU among the three hundred best workplaces, where it was the only Czech university to make the list!

Prestigious price for Indologist

Blanka Knotková-Čapková from the Department of Applied Social Sciences of the CU Faculty of Science received a prestigious international Rabindranath Tagore Award (named after the first Nobel Prize laureate from Asia) in the field of literary research.

Meetings with Norwegian experts

26/02 Experts from the Norwegian Centre for Violence and Traumatic Stress Studies shared their experiences of survivors after the attack on the island of Utøya in Norway with representatives of CU and other universities, government institutions, and initiatives involved in providing assistance after the tragic events at the CU Faculty of Arts.

Honorary doctorates for chemist and biologist

04/03 The title of *doctor honoris causa* was bestowed on two prominent international experts: Michael Grätzel, Professor of Physical Chemistry at the École Polytechnique Fédérale de Lausanne, and Kari Jussi Hemminki, Professor of Molecular Biology, who led research at the Biomedical Centre of the CU Faculty of Medicine in Pilsen.

March 2025

European research on language models to be led by CU

07/03 A meeting involving leading European companies, research institutions and large computing centres involved in artificial intelligence was held in Prague. As a consortium, they launched the OpenEuroLLM project for the development of next-generation open large language models, supporting the development of European capabilities in the field of artificial intelligence. The main coordinator of the project is Charles University, headed by Professor Jan Hajič (CU Faculty of Mathematics and Physics).

Brain Week – Limbic System – The Role of the 'Emotional' Brain

10.–16/03 Fascinující svět neurověd představil nejnovější objevy a trendy ve výzkumu mozku. V Didaktikonu zazněly přednášky od předních odborníků z 1. LF a 3. LF UK. V Hradci Králové pro širokou veřejnost přednášel Pavel Póczoš z Neurochirurgické kliniky LF HK UK a FN HK.

Prestigious awards for the best students

01/04 Interesting scientific topics, great results in study or sport, as well as society-wide activities and helping others are regularly recognised by the top representative of Charles University. In April, Rector Milena Králíčková bestowed the prestigious Rector's Award, the Rector's Extraordinary Award and the Bolzano Prize on students in the Hall of Patriots.

Charles University celebrates its 677th anniversary

07/04 On the occasion of its "birthday", which CU perceives as a space to support and recognise science at the University and members of the academic community, the traditional Miloslav Petrusek Award for representation and promotion of the University and the Bedřich Hrozný Award for research activities were bestowed. The event took place in the Great Hall of the Carolinum.

April 2025

Exercise Keeps Me Warm

15/04 The aim of the 7th edition of the Exercise Keeps Me Warm charity run, which was included in Konto Bariéry's national Run and Help project, was to encourage the general public to exercise and contribute to a voluntary financial collection to help purchase sports prostheses for three young athletes called Kuba, Elen and Péťa. More than 350 participants, who covered more than 2,000 km together, took part in the event.

Space Memorandum with the Ministry of Transport

24/04 Charles University signed a memorandum with the Ministry of Transport of the Czech Republic on mutual support and cooperation in the field of space research, with the aim of jointly developing activities in the popularisation of science and education related to space research, while supporting young people's interest in studying fields related to space technologies and research.

University visited by the President of Ukraine

06/05 During his stay in the Czech Republic, Ukrainian President Volodymyr Zelensky visited Charles University and gave a lecture in the Carolinum on the role of the individual and personal decisions in wartime and on the geopolitical importance of Ukraine. The lecture was followed by a lively discussion with Ukrainian students at Charles University and students of Ukrainian Studies.

May 2025

Faculty of Arts launches the ERA-AREAS project

The CU Faculty of Arts was successful in the prestigious ERA Chair programme and launched the ERA-AREAS project. By connecting international teams in the newly established Centre for Multidisciplinary Area Studies, it will support comparative research of the regions of the globe and at the same time strengthen the standing of the CU Faculty of Arts as an important European centre for area studies.

A Healthy Spirit in Healthy Hradec

23/05 A Healthy Spirit in Healthy Hradec was a preventive/awareness event held to mark the 800th anniversary of the founding of Hradec Králové and the 80th anniversary of the Charles University Faculty of Medicine in Hradec Králové. The faculty offered the public free preventive examinations, expert consultations, workshops and lectures on healthy lifestyle and prevention of diseases of affluence.

CU wins the HR Excellence in Research Award again

12/06 Charles University became the first university in the Czech Republic to win the prestigious HR Excellence in Research Award, awarded by the European Commission, two years in a row. Recognition through this award confirms the University's long-term efforts to foster a supportive, transparent and modern environment for researchers and staff at all stages of their careers.

June 2025

Hlávka Prize for Spinal Neurology

16/06 Professor Ivana Štětkářová, Head of the Department of Neurology of the CU 3rd Faculty of Medicine and the Královské Vinohrady University Hospital, received the Josef Hlávka Prize for scientific literature for 2024 in the field of medical sciences for her work as main editor of the book Spinální neurologie.

Kateřina Čapková receives ERC Advanced Grant

Historian Kateřina Čapková from the Charles University Faculty of Arts has achieved extraordinary international recognition. She was the only Czech recipient of the prestigious ERC Advanced Grant to support cutting-edge research in modern history. The award-winning scholar focuses on the "other" history of Central and Eastern Europe – she studies history from the perspective of the Roma, Jews and people with disabilities.

American prize for educator Šiška

25/06 Professor Jan Šiška (CU Faculty of Education), an expert in education and support for people with mental disabilities, received a prestigious award from the American Association on Intellectual and Developmental Disabilities in Washington, D. C.

Science: Relationship between energy and diversity in terrestrial vertebrates

Ecologists have long tried to understand how the amount of available energy affects the number of species. New research published in the journal Science, in which Eliška Bohdalková and David Storch from the Centre for Theoretical Studies and the Department of Ecology at the CU Faculty of Science also participated, brings a new perspective to this debate.

July 2025

Global Conference on Memory Studies

14–18/07 The CU Faculty of Social Science co-organised the 9th annual conference of the Memory Studies Association. The event attracted more than 1,200 academics, artists and activists from almost 100 countries to Prague. Attendees discussed the memory of society and how it responds to crises and subsequently recovers from them – both in the past and in the present.

Interest in the Summer School of Slavonic Studies continues

17/07–14/08 The CU Faculty of Arts hosted the 68th edition of the Summer School of Slavonic Studies. The international educational event, which is organised by the Institute of Czech Studies for Foreigners and Communication of the Deaf, was attended by 118 students from more than 30 countries around the world. The summer school, which focuses on teaching Czech language and culture, is the oldest programme of its kind in the Czech Republic.

Movement Prague 2025

26/08 The pilot year of the Movement Prague 2025 event confirmed the uniqueness of the CU Faculty of Physical Education and Sport in the field of vocational training. The programme, consisting of an inspirational lecture and discussion focused on pedagogical practice, safety and the organisation of school sports events, offered a wide range of workshops and practical activities.

August 2025

Vaccination reduces the return rate of precancerous lesions

A wide-ranging study headed by Marek Petráš (CU 3rd Faculty of Medicine) showed that HPV vaccination significantly reduces the risk of recurrence of serious precancerous changes in the cervix after their surgical removal. The study involved 10,000 women who had undergone a procedure known as conization. It confirmed that vaccination helps, regardless of whether it is done before or after the procedure. The study was published in the prestigious The Lancet Regional Health – Europe journal.

Nobel laureate Ambros gives a lecture at the CU Faculty of Science

26/08 Charles University was honoured by a visit by the 2024 winner of the Nobel Prize in Physiology or Medicine, Professor Victor Ambros, who contributed to the discovery of a new way of regulating gene expression using microRNAs. In the crowded Great Geological Auditorium of the CU Faculty of Science, the Nobel laureate gave a talk entitled “Development timers in a tiny worm”, followed by a lively discussion with the audience.

Two multimillion-Euro grants are heading to Charles University

04/09 Charles University wins grants from the European Research Council (ERC) with applications for research topics in the fields of bioengineering and law. The successful researchers were Andrea Gálisová from the CU 1st Faculty of Medicine and Jakub Drápal from the CU Faculty of Law. In total, they received 3.4 million EUR. ERC Starting Grants support the independent careers of outstanding fledgling researchers at the stage when they are creating their own research teams or programmes.

Researcher' Night – Wealth

26/09 This year's edition of Researchers' Night was on the topic of Wealth, and Charles University prepared events not only at its home locations in Prague (Albertov and the Pilsen and Hybernská Campuses), Hradec Králové (CU Faculty of Pharmacy and the Educational Centre of the CU Faculty of Medicine in Hradec Králové) and Pilsen (Café Regner), but also in Karlovy Vary.

September 2025

New ECG technology advances heart treatment

Following successful testing, ultra-high-frequency ECG (UHF-ECG) obtained European CE certification and was made available to medical professionals in Czech and European hospitals. The new technology allows doctors to see detailed information about of cardiac activity, helping them to better define treatment for patients with disorders of cardiac electrical activity. A number of professional workplaces helped to develop the patent-protected innovation; these included the Department of Cardiology of Vinohrady University Hospital and CU 3rd Faculty of Medicine.

Winners of FameLab science popularisation competition announced

30/09 The winners of the Czech section of the FameLab international scientific popularisation competition, which brings science closer to the public in the form of stand-up outputs, were announced in the Municipal Library in Prague. Among the twelve finalists, Pavel Haman from the CU Faculty of Mathematics and Physics came third for his three-minute stand-up show on the topic of computational neuroscience entitled Seeing in Brain Language.

Interest in studying at CU is growing

01/10 Seventeen faculties of Charles University were ready for the start of the new academic year 2025/2026. Almost 29,000 new students (about 2,000 more than last year) will start studying in all study programmes in Prague, Pilsen and Hradec Králové. New features of study programmes included an electronic diploma, international programmes and short-term micro-certificate courses. Applicants for study at Charles University submitted a total of 70,785 applications (almost 500 more than in the previous year).

Doctorate for Garton Ash and support of Donatio Universitatis Carolinae Chair

09/10 Timothy Garton Ash received an honorary *doctor honoris causa* degree from Charles University. The British writer has long shaped the debate on European history, democracy and freedom of speech. The event is also related to the success of the CU Faculty of Arts in the selection procedure for funding from the Donatio Universitatis Carolinae Chair, which facilitates the involvement of international experts in research and teaching.

MAIVE meta-analysis in Nature Communications

Economists Zuzana Havránková and Tomáš Havránek from the Institute of Economic Studies of the CU Faculty of Social Sciences achieved a significant success when, together with their international colleagues, they published an article in the prestigious Nature Communications journal. The study represents a new method of meta-analysis designed for the social sciences.

October 2025

Rectoral Election won by Jiří Zima

31/10 The Academic Senate of Charles University elected the rector for the period 2026 to 2030 in the second round of the rectoral election. The winner was Professor Jiří Zima, an analytical chemist from the CU Faculty of Science. Zima received 40 votes in the second round. The new rector will take office on 1 February 2026 following his appointment to the office by the President of the Czech Republic. A total of five persons applied for the position of rector.

17/11 Universities honoured the legacy of the student protests of 1939 and 1989 through commemorative events at the memorial plaque on Národní třída, the Hlávka Dormitory and at Vyšehrad. The academic community of Charles University then met in the early evening in the Great Hall of the Carolinum. The Arnošt z Pardubic Prize, the CU Grant Agency Awards and the Cori Awards were awarded as part of the programme of events held to mark the important dates.

Freedom should not be taken for granted

November 2025

President of Albania discusses possibilities for cooperation

20/11 Bajram Begaj, the President of Albania, visited Charles University during an official visit to the Czech Republic. After discussions with the university management about possibilities for cooperation in education and research projects, he held a discussion with students in the Hall of Patriots.

President of Poland holds lecture at CU

24/11 Charles University visited by the President of the Republic of Poland, Karol Nawrocki. In the Carolinum, he first met with the management of Charles University, with whom he discussed possibilities for developing relations between universities in the Czech Republic and Poland. The President then held a lecture for students of Polish studies, Polish students at Charles University and ambassadors from both European and non-European countries on current issues in international politics.

Erasmus Mundus grant for Charles University

CU has become one of the most successful applicants in the global Erasmus Mundus grant competition, supporting the creation of joint international study programmes enabling students to study at multiple universities in different countries and obtain a joint qualification. CU successfully applied for four projects, in three of which it is a partner. For comparison: the overall success rate of applications was less than 20% this year, and CU was successful in 66.7% of applications.

Number one in the systematic prevention and treatment of addictions

25/11 Experts from the Addictology Clinic of CU 1st Faculty of Medicine and the General Faculty Hospital initiated a project entitled National Support for Addiction Screening (NPAS), which aims to improve the treatment of addictions. A fundamental benefit of the NPAs project is the systematic increase in the availability of tools for the prevention of risk behaviour. This will result in the faster detection of the problem, and thus faster treatment.

New EduVia secondary school

01/12 The CU Faculty of Education in cooperation with the City of Prague founded a new secondary school, known as EduVia. By signing the memorandum, Charles University became a co-founder of the school. Classes will start on 1 September 2026.

Honorary doctorates for prominent figures in medicine

02/12 Charles University bestowed the honorary degree of *doctor honoris causa* on Professors Béla Péter Merkely and Marc Van Ranst. Rector of Budapest Semmelweis University and leading cardiologist Béla Péter Merkely is engaged in cooperation with the Cardiocentre of CU 3rd Faculty of Medicine and other medical faculties. Virologist and epidemiologist from the Catholic University of Leuven, Marc Van Ranst, teaches at the CU Faculty of Science.

Change the World Through Exercise: competition with a real impact

04/12 The CU Faculty of Physical Education announced the winners of this year's Change the World Through Exercise competition, which supports young innovators in the field of exercise, health and prevention. First place went to a team of students from the Brno University of Technology for their Sporter project, second place to the representatives of the CU Faculty of Physical Education and Sport, Tereza Stejskalová and Eliška Thompsonová, for their Blind Baseball Czech project, and the Study in Motion project by Natálie Šubrtová from the CU Faculty of Medicine finished in third place.

December 2025

We will never forget

21/12 The academic community honoured the memory of the victims of the shooting at the CU Faculty of Arts. First, a benefit concert entitled Two Years After took place in the Protestant Church of St Salvator; the concert was organised by Ears for the Soul and United by Hope associations together with the CU Faculty of Arts. In the early evening, people gathered at the memorial shrine at the monument on Jan Palach Square in Prague.

Professor Kateřina Králová to sit on the ERC Research Council

The ERC Research Council has six newly elected members, one of whom is Kateřina Králová from the CU Faculty of Social Sciences. This is the first time that Charles University has ever been represented on the ERC Research Council. The ERC Research Council is the governing body that sets the funding strategy for this leading European programme for the support of frontier research.

Charles University in the mobile app

The formal opening of the 2025/2026 academic year was accompanied by the official launch of the Charles University mobile app, a new central tool intended for existing students and applicants, teachers, and University staff.

The new app is available in both Czech and English language versions from 1 October 2025. The goal of the app is to make important university services accessible and to provide clear information in a single place through mobile devices. By the end of 2025, the app had been downloaded more than 15,000 times and its functions utilised by 11,000 active users.

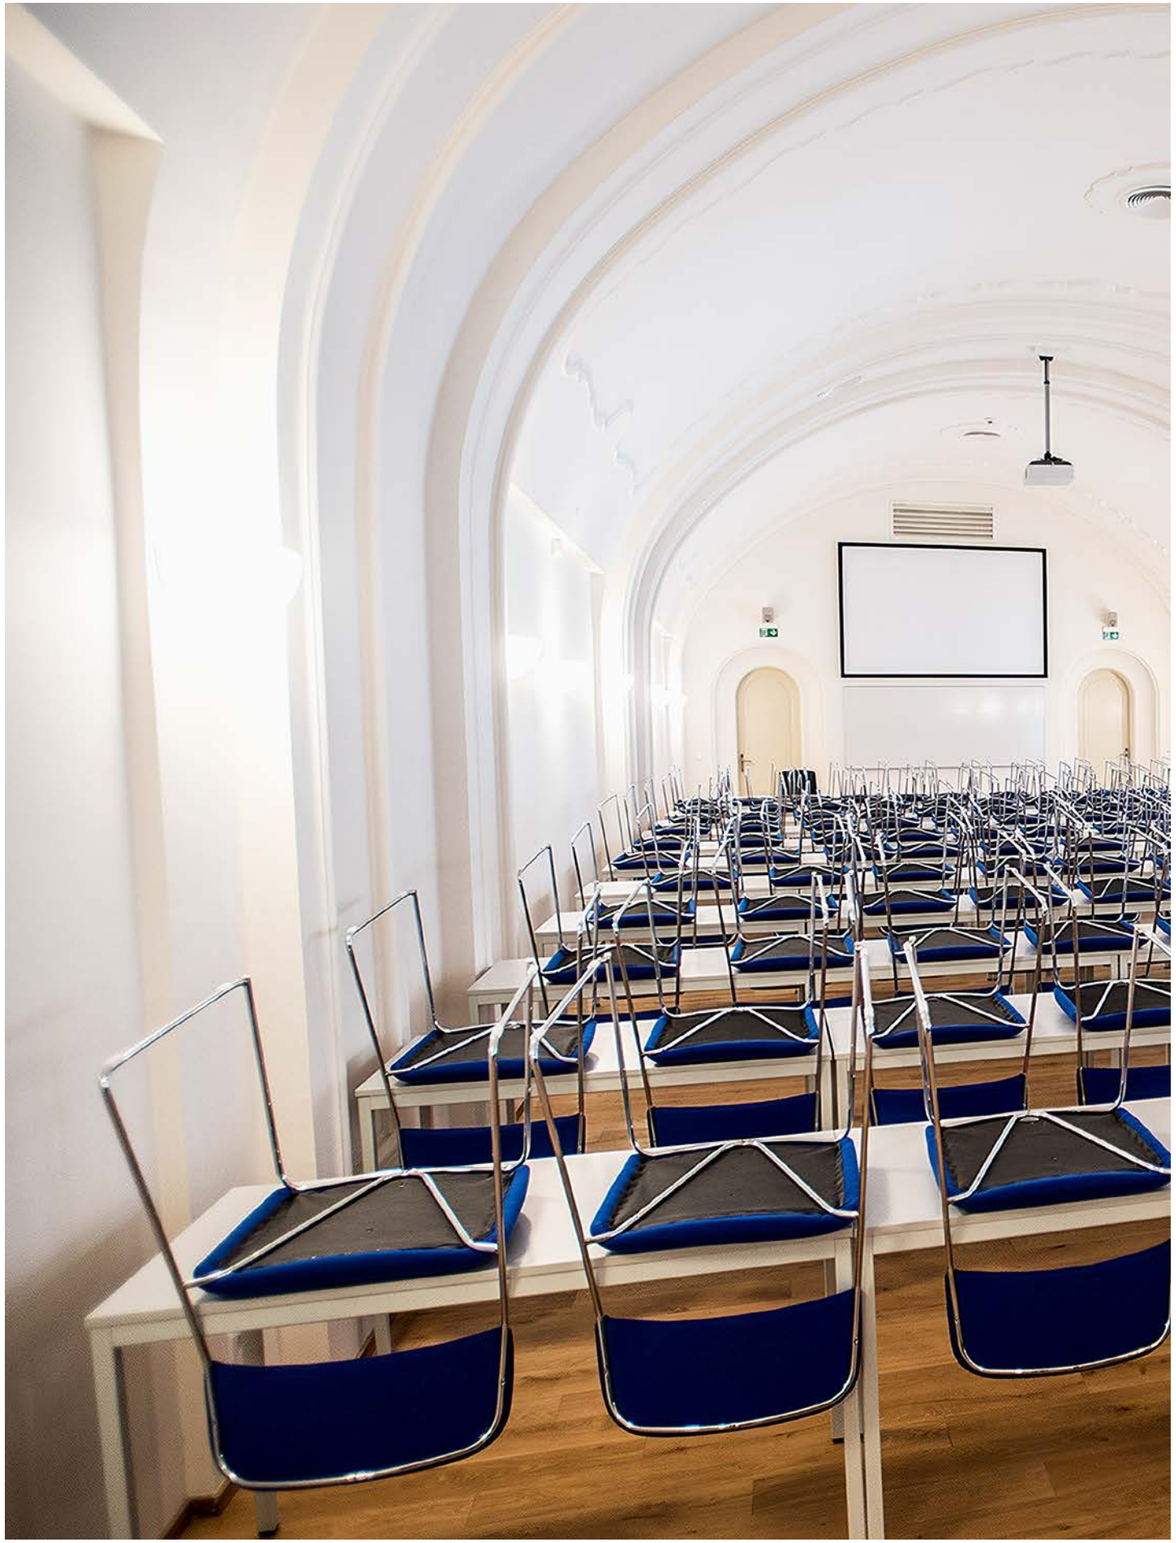

One of the most used functions – especially by students – is the connection to the Study Information System (SIS), which allows users to display, for example, timetables, study courses they are enrolled in, study results, examination dates or enrolment for exams.

The app also provides news from the University and the faculties, an interactive map, a user-friendly directory of other digital services provided by Charles University, and a section with practical information for students and staff. At the end of 2025 a module connected to the library system, which allows displaying current loans and reservations, was added to the app.

From the very beginning, the app has also been used to share important university-wide information (grants, CU Point events) and urgent current messages (e.g. assistance in the event of a fire at the dormitories, etc.).

The app is a work in progress and it is developed on an ongoing basis in cooperation with external developers, the IT department and other workplaces of Charles University. One further key component of the development of the mobile app is the collection and evaluation of feedback from users, which is used as a basis for further modifications and the planning of new functionalities. In the next period, the attention of the team of creators will focus mainly on the development of links with university canteens, support for the Buddy programme (which brings local and international CU students together) and the further improvement of the user experience in both the Czech and English versions of the app.

(Note: The mobile app can be downloaded from the App Store or Google Play, where you can provide feedback or report any problems and deficiencies.).

Annual Report on the Activities of Charles University for 2025

Published by Charles University
